

Travel Management System

Introduction

Tms is which helps travel agents manage the service providers booking, pricing... It's a key to business innovation, acquiring new clients, and breaking into new markets. It provides solutions for travel needs, guides travellers to option.

I chose this because when I think of travelling it's Provocative for me because it unwinds, broadens our mind, experience new culture and diversity, helps understand nature, create unforgettable memories, learn to live in the present moment giving yourself time it also helps learn more about the world than you could from any book and a lot more. So I wanted to motivate people to get out of their comfort zone hinder their busy life and experience life in a different way and Rehabilitate from all stress.

To travel is to take a journey into yourself -Danny Kaye

Functionality

- Booking
- Recommended places
- Review

Functional

- Reliability requirements
- End user requirement: book according to their choice share comments...
